RAW MILK AND CREAM

are of all single causes the most prolific for the production of diseases.

Ill health or lack of cleanliness among dairy hands, stable dirt, soiled utensils, impure rinsing water, together with the warmth and dust of the stable, are the principal causes of contamination, and, as milk is the best-known medium for breeding germs, these rapidly multiply into many millions.

Tuberculosis, scarlet fever, diphtheria, septic sore throat, and notably typhoid and other intestinal diseases, are often caused by raw milk and cream, and no amount of inspection can be relied upon to prevent milk contamination at all times.

The only reliable means for preventing milk infections is pasteurization, and this simple treatment does not change the character of the milk nor affect its nutritive value or its digestibility.

We can home-pasteurize milk by bringing it to near boiling, then cool, and keep cold and covered until used.

Even entirely healthy adults who would ordinarily not be affected by impure food if they continue drinking impure milk and cream long enough will eventually vitiate their blood and undermine their natural resistance and become subject to attacks of sickness, the underlying cause of which is usually not suspected.

But children, sick people, and all who are in a rundown condition should in particular never drink raw milk or cream, nor eat ice cream made of them.

The Health Officer of the District of Columbia will furnish free information as to the average grade of safety of the milk and cream, raw or pasteurized, sold by any milk dealer in this city.

Society for Prevention of Sickness
E. BERLINER, Secretary

The Bulletin of the Society for Prevention of Sickness, signed by Mr. E. Berliner, are based on much careful study, and they deserve the attention of the public for whose benefit they are issued.

Gen. GEO. M. STERNBERG,
(Surgeon General, U. S. Army, retired).

Dr. GEO. M. KOBER,
(Prof. of Hygiene, Georgetown University).

If the average woman only knew it, it is not at all difficult to preserve the youthful contour and velvety smoothness of complexion. Every woman hater to see her face wrinkled or baggy, and practically every one has experimented with some sort of patent remedy in the effort either to remove such condition or ward it off.

As a matter of fact, the most effective remedy in the world is one that any woman can easily make up herself at home, in a moment's time. Let her take one ounce of pure powdered azoite, which she can purchase at any drug store, and dissolve it in a half pint of witch hazel. Apply this harmless and refreshing solution to the face every day. The results are surprising and instantaneous. Even after the very first application a marked improvement is evident. The wrinkles are less in evidence and the face has a comfortable, anti-aging feeling of firmness that is most delightful. Adv.
